Przygotuj w swoim pokoju miejsce przeznaczone do ćwiczenia na gitarze. Ustaw tam odpowiedniej wysokości krzesło oraz pulpit do nut. Zawsze używaj też podnóżka lub podgitarnika. Pamiętaj, że zaniedbanie prawidłowej postawy nie tylko uniemożliwi Ci ładną grę, ale też może w przyszłości stać się przyczyną skrzywienia kręgosłupa.

Jak nastroić gitarę
How to Tune the Guitar

Istnieje wiele metod strojenia gitary. Poniżej przedstawiony jest jeden z najpopularniejszych sposobów, w którym pierwszą strunę należy nastroić przy pomocy kamertonu, a następnie kolejne struny dostrajać względem siebie.

1. Kamerton podaje dźwięk „A".

2. Naciśnij pierwszą strunę na piątym progu (dźwięk „A") i porównaj jej dźwięk z tonem kamertonu. Oba dźwięki powinny być tej samej wysokości. Kręcąc maszynką, dostrój pierwszą strunę do kamertonu.

3. Naciśnij drugą strunę na piątym progu i porównaj jej dźwięk z pierwszą, już nastrojoną, pustą struną. Kręcąc maszynką, dostrój drugą strunę do pierwszej tak, aby oba dźwięki brzmiały tak samo.

4. W ten sam sposób nastrój pozostałe struny (ilustracja wskazuje, które progi należy naciskać na kolejnych strunach).

There are many guitar tuning methods. Below you will find one of the most popular, in which the first string should be tuned with a tuning fork and the next strings should be tuned to each other.

1. The tuning fork gives "A".

2. Press the first string on the fifth fret and compare the sound with that of the tuning fork. Both sounds should have exactly the same pitch. Tune the first string to the tuning fork with the tuning peg.

3. Press the second string on the fifth fret and compare its sound to the one of the first string which has already been tuned. With the tuning peg tune the second string to the first so that both sound exactly the same.

4. Use the same methods with the remaining strings (the illustration shows which frets should be pressed on respective strings).
